WordPress Security & Recovery Expert

CASE STUDIES

Real WordPress recoveries · Before & after metrics · Client quotes

6+ years · 500+ recovered WordPress sites · 100+ verified 5★ Fiverr reviews
Dhaka, Bangladesh · Clients in US · UK · Canada · Australia · EU

How to read this document

Each case study below documents a real client engagement — the problem the site faced, the exact steps taken to fix it, the measurable outcomes, and a quote from the client. Names and identifying details are lightly redacted to protect client privacy; full references are available on request.

What every engagement includes

- Full backup before any change is made to files or database
- Detailed scan report with every file cleaned or removed
- Post-clean hardening: firewall, 2FA, salts, permissions, updates
- 30-day monitoring window with re-infection protection
- Direct WhatsApp / Fiverr access to me — no support ticket queues

ECOMMERCE · GOOGLE BLACKLIST

Case 01 — Shopify-migrated Store Flagged as “Deceptive Site”

THE PROBLEM

A US-based ecommerce store lost 100% of Google traffic overnight after Chrome started showing a red “Deceptive site ahead” warning. Malware was injecting fake payment forms to steal customer card data.

THE SOLUTION

- Full malware scan across 12,000+ files and database tables
- Removed 47 malicious PHP shells and 3 backdoor admin accounts
- Submitted Google Search Console reconsideration request
- Installed Wordfence Premium + custom firewall rules

RESULTS

18 hours	48 hours	100%
Total cleanup time	Google blacklist removed	Traffic recovered in 7 days

“We were losing \$2,400/day. Joynal got us back online in less than 3 days. Best money I’ve ever spent on Fiverr.”

— Michael R., Store Owner (Ohio, USA)

BLOG · JAPANESE SEO SPAM

Case 02 — 6-Year-Old Blog Overrun with Japanese Pharmacy Spam

THE PROBLEM

A lifestyle blog with 800+ posts was showing Japanese text and pharmacy links to search engines while appearing normal to logged-in admins. Google indexed 3,200+ spam pages, tanking domain authority.

THE SOLUTION

- Cloaking script identified and removed from wp-config.php
- Cleaned 3,200+ spam pages from database (SQL surgery)
- Submitted URL removal requests via Search Console
- Hardened .htaccess and disabled xmlrpc.php

RESULTS

2 days	3,200	+340%
Full recovery	Spam URLs removed	Organic traffic in 30 days

“Two other “experts” tried and failed. Joynal fixed it in a weekend and my traffic came back stronger than before.”

— Sarah T., Blog Owner (Toronto, Canada)

PERFORMANCE · CORE WEB VITALS

Case 03 — SaaS Landing Page — 34 to 98 PageSpeed Score

THE PROBLEM

A B2B SaaS company's WordPress landing page scored 34/100 on mobile PageSpeed with a 4.2s LCP. Google Ads Quality Score was crashing conversion rates and inflating CPCs.

THE SOLUTION

- Converted 47 PNGs to WebP with responsive srcset
- Deferred non-critical JS, inlined critical CSS
- Set up WP Rocket + Cloudflare CDN
- Database optimization + object caching via Redis

RESULTS

98/100	1.2s	-42%
PageSpeed Score	LCP (was 4.2s)	Google Ads CPC

"Our conversion rate went up 61% just from the speed improvements. Joynal knows exactly what Google wants."

— David L., Marketing Director (London, UK)

AGENCY · FULL COMPROMISE RECOVERY

Case 04 — Agency Client Locked Out of Their Own WordPress Admin

THE PROBLEM

A digital agency's client was completely locked out of WordPress. Admin panel returned login errors, files were replaced with encrypted versions, and the hosting provider threatened suspension for spam email activity.

THE SOLUTION

- Restored access via cPanel + SQL user reset
- Removed 8 backdoor plugins and 2 malicious mu-plugins
- Restored 200+ core WP files from clean install
- Set up 2FA, changed all keys/salts, cleaned mailer

RESULTS

6 hours	24 hours	0
Admin access restored	Full site restored	Data loss

"This was our worst nightmare — a client threatening to sue us. Joynal saved the account and probably our agency."

— James P., Agency Owner (Melbourne, Australia)

Ready to recover your site?

If your WordPress site is hacked, blacklisted, slow, or locked, I can usually diagnose and start work within an hour of your message. Every engagement includes a full backup, a written scan report, and 30 days of re-infection monitoring.
